

Homes Per Linear Mile Statement and Documentation:

Name:

Organization/Business (optional, eg. HOA):

Address:

Email:

Phone number:

1. Address of Location of nearest Point-of-Service (POS): _____
[Provide address of the nearest dwelling/business that has verifiable cable service from the Franchise Provider (Comcast, Verizon or Cox) that you seek.]

2. Linear Street Mile Distance (LSM): _____ miles. [Measure the shortest distance along the roads/streets from the POS to your home/business or the last home/business to which you seek service. If possible, start your measurement from the cable junction box in front of this address. Provide attached documentation of how you measured the LSM (car odometer reading, google maps, county maps, etc).]

3. Number of homes along the LSM (N): _____ [Along the same path you measured the LSM, count the number of homes you pass between the POS and your home/business or last home/business to which you seek service, counting all dwellings on either side. Provide attached documentation substantiating the number of homes you counted, including list of addresses, and map, like google maps printout]

4. Estimate the HPLM = $N/LSM =$ _____ [Write in the calculation of HPLM]

I certify this measurements and supporting documentation are accurate to the best of my knowledge.
