RE: Recording of Plats

Dear Mr. Harvey:

As per our discussion in regard to the State Standards for Recorded Instruments with LeaAnn Ennis and Andrea Hornung, we have determined from plats that have been previously recorded in our land records, the shaded areas on the documents, once scanned, are appearing black and non-readable. This is not beneficial to any parties involved. Any future patrons or title examiners looking for the information recorded on such document will not be able to use the document, if in fact, they need the information where it has blackened out.

One of the duties of the Clerk of Court is to preserve and protect the history of Stafford's records. I would like to think that would be everyone's goal. With that said, I understand that your office works very hard to manage the wealth of information that comes through your office, so with your help in heading off these plats with the shading, we would like to set the date of January 15, 2017 as a date in which we will no longer take plats with shading that when imaged, produce blackened areas where the shading is.

Thank you in advance for all your help, and I apologize for any inconvenience this causes your office.

Respectfully,

Kathy Sterne
Clerk of Court
